- Display Daily Records

```

--->>> Display Records Section <<<---

```

Date	SalID	SalName	LoadingAmount	UnloadingAmount	SaleAmount
18/8/2020	SAL01	Alok	6000	500	\$500
10/8/2020	SAL05	Kamal	5500	200	\$300

Press any key to continue...

After entering to the Display Daily Records you can access to a tabular record section about all daily records.

- Account Details

```

--->>> Account Details Section <<<---

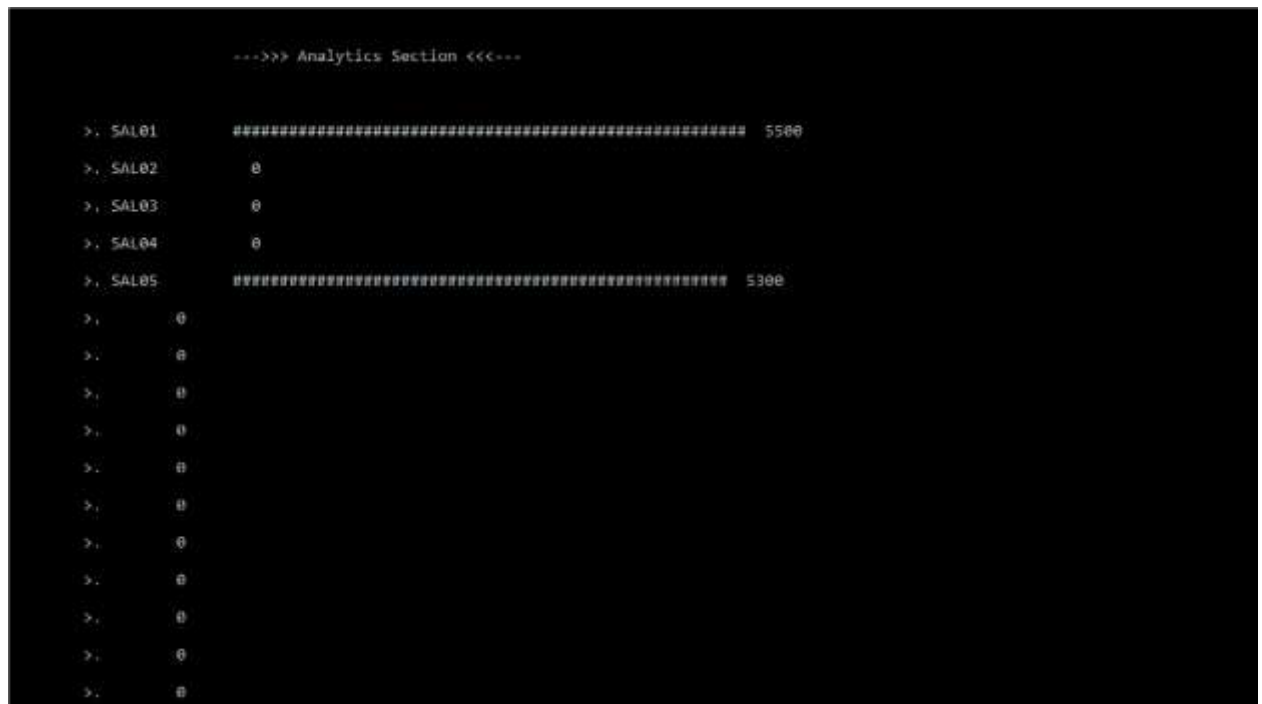

```

SalID	SalName	DrID	DrName	VehiNO
SAL01	Alok	DRI01	Prasanna	ABC1234
SAL02	Jayathilaka	DRI02	Saman	ABZ1245
SAL03	Pasan	DRI03	Kalum	ADF3456
SAL04	Nuwan	DRI04	Sadun	AS2311
SAL05	Kamal	DRI05	Rajitha	AP1289

Press any key to continue...

If you need to access salesman's account details and the appropriate driver details, you need to access account details section from the main menu entering "r". As soon as you access the section it provide a tabular form of structure with above mentioned details.

- Analyze Salesman Progress

Entering to this section you can see a visualization about salesman progress. This system can only hold up to maximum count of 20 salesman. And if the system has no more than 20 salesman, the remaining progress will show as “0”.

Other Special Function in the Source Code

- void memoryLoad(struct salesman salesmanArr[])

```
void memoryLoad(struct salesman salesmanArr[])
{
    FILE *loadFile;
    loadFile = fopen("data.txt", "a+");
    int n = 0, ch;
    while(EOF != (ch = getc(loadFile)))
    {
        if(ch == '\n')
            n++;
    }
    rewind(loadFile);
    for(i=0; i<n; i++)
    {
        //////////////////////////////////////
        fscanf(loadFile, "%s %s %s %s %s", salesmanArr[i].name,
        salesmanArr[i].check = 1;
    }printf("\n");
    system("cls");
    return;
}
```

This functions load records data from secondary memory (Hard) to the primary memory (RAM) in every start up.

- Structures that are available in source
 - salesman
 - driver
 - stock

Stock and driver structures are implemented in salesman structure as nested structures to reduce the complexity.

- File Handling and Test Cases

- data.txt file
